

INNOPHASE is a rapidly growing, innovative wireless semiconductor startup with headquarters located in San Diego, CA. We are developing complete wireless solutions with significantly differentiated power dissipation, performance and cost tradeoffs. Our innovative technology also dramatically improves wireless product flexibility and ease-of-use for product developers. The initial InnoPhase product is now entering the market and we are ramping up development of our next generation product. We are looking for an experienced Product/ Program Manager to drive this complex product through development. We are looking for passionate and capable candidates to join our fast-paced and motivated team. This role is an excellent opportunity for someone that enjoys a small and agile group where you can make a great impact.

This is a full-time position based in San Diego. In addition to benefits and perks below, Innophase offers relocation assistance!

Key Responsibilities

- Program Management of the Hermes 2 product, from completion of product definition through prototyping/demos and commercial launch
- Work with internal and external resources to develop a detailed, resourced execution plan
- Chair periodic and impromptu project meetings to drive the critical path, capture, document and drive actions to resolution, communicate minutes, actions and key dates etc.
- Drive and understand the details while being able to provide salient executive summaries

Desirable Skills

- Strong technical knowledge in 5G NR cellular infrastructure systems
- Familiarity with highly integrated SoCs, with tightly intertwined RF/Analog/Digital/SW/FW implementations
- Excellent interpersonal skills and the ability to influence without authority

Benefits and Perks

- Competitive salary and stock options
- Learning and development opportunities
- Employer paid health benefits
- Paid vacation/holidays/sick/parental leave
- Flexibility to balance quality work and personal lives
- Annual holiday and summer events
- Free snacks and drinks

Job Requirements

- CS/EE or related technical degree preferred
- 5-10 Years Program Management experience
- Strong experience in SoC development for wireless protocols (e.g., 5G NR)
- Excellent problem-solving skills with the ability to selectively and effectively engage subject matter experts
- Strong organizational skills to successfully manage detail and overall plan
- Strong familiarity with program management methods and tools for plan and schedule creation, critical path management, resource and conflict resolution, etc.
- Excellent communicator at all levels
- Capable of working with all relevant disciplines, with staff located across locations/time zones
- Comfortable and effective in demanding environments as well as a suitable balance of quality and sense of urgency to get things done
- A team player with a genuine desire for meeting quality targets and finishing on time
- Experience in delivering technical presentations to various audiences
- Adept at managing interdisciplinary interdependencies and conflict resolution
- Skilled MS Office user (Word, Excel, PowerPoint, Project)
